Care & Repair • Sharrow Vale planter wall (DPP-PW-0142)

This is a PLACEHOLDER document. Replace assets/care-and-repair.pdf
with your own printable care & repair guide.

Everyday care

- Wipe with a damp cloth and mild soap; avoid solvents / pressure washing.
- Keep out of prolonged direct heat (HDPE softens above ~60C).
- Refresh the compost in the planter pockets each spring.

If a tile is cracked or damaged

- Small cracks: tiles can be gently re-pressed at a workshop.
- They do not need binning.
- Beyond repair: return it so the material re-enters the local remake cycle.

Return point: Co-Lab 3 | Reshredded into its next form. Nothing leaves the neighbourhood.
